CHARMINGO

What is Virtual Reality (VR)?

VR is a virtual world that uses computer simulation to produce three-dimensional space. It provides users with visual, auditory and tactile sensory simulation, which makes the user feel as if they are immersed in the real world.

immersed in the real world
simulation, which makes

Box VR cardboard is not good enough??
Please check our new Flat VR cardboard which is:

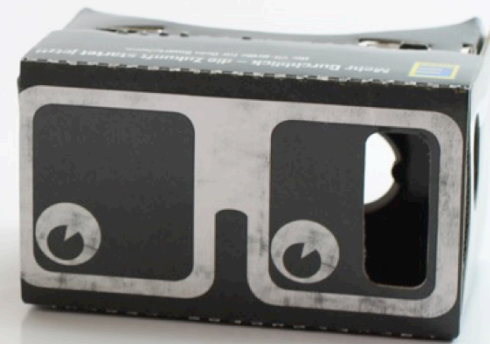

- Saving space
- Saving transportation cost
- Easy for storage
- Easy for distribution
- More space for your printing
- More eye-catching.....

- More eye-catching.....
