Transition Lenses Limitation

- High price
- Not work inside a car, because the windscreen filters out the UV typically block UV.
- No control. In some case like photo shooting outdoor, dark lens is not preferred.
- Reliability starts to degrade over time
- At high-altitudes there's too much ambient UV and the lenses are always dark.

CHARMINGO

**Magnetic
Interchangeable Lenses
Eyewear is a great
solution**

CHARMINGO

AND, with our brand new locking system, it brings more reliable and safety experience to wearer.
